

Replaceable Refractory Charged Cartridge Heaters

Replaceable Refractory Charged Cartridge Heaters

HEATCO make **REPLACEABLE CARTRIDGE HEATERS** are made from long-lasting and high quality refractory materials which are mounted horizontally in a metallic tube as per design to suit its application. These are easily replaceable once the Cartridge Heater gets worn out. In standard production the heating element is made from Kanthal or Nickel/Chrome heating elements.

Length of unheated zone(Lm), is to be determined by the customer.

TECHNICAL DATA:

Lenght (L) [mm]	200 - 4000
Diameter (Ø) [mm]	12; 16; 25, 30, 32; 35,36, 38,41, 45 etc.
Voltage [V]	220; 230; 380; 3x380; 400; 3x400 or different
Max. temperature [°C]	500
Heating power [W]	0.25 KW to 10.0 KW
Max. Surface load [W/cm²]	7

AREA OF APPLICATIONS:

Heating of: Air, Oil, Water etc.

Used in : Confectionery; Electroplating Plants; Quenching oil baths, Drying Ovens, Degreasing Baths .
