

Finned tubular heating elements

Finned tubular heating elements

Finned tubular heating elements from HEATCO are the most versatile and the best suited solutions to a large number of applications. Finned tubular elements from HEATCO are factory-configured to almost any shape or size. Custom bending diameters can be made upon request. Typically using steel, stainless steel, Incoloy, inconel or titanium alloys, tubular elements are often regarded as the foundation of all heating elements. These heating elements have a strong outer sheath to help protect the heater from physical stress and uses high quality alloys to allow efficient heat transfer from resistance coil to your heating medium.
